

JN0-230 Certification - Valid Exam Dumps Questions Study Guide! (Updated 85 Questions) [Q34-Q53]

JN0-230 Certification - Valid Exam Dumps Questions Study Guide! (Updated 85 Questions) [Q34-Q53]

JN0-230 Certification – Valid Exam Dumps Questions Study Guide! (Updated 85 Questions)
JN0-230 Dumps are Available for Instant Access using Exams4sures

Understanding functional and technical aspects of IPv6

The following will be discussed in **JN0-362 exam dumps**:

- Identify the concepts, operation, or functionality of IPv6- Nonstop bridging (NSB)- Static routes- Bidirectional Forwarding Detection (BFD)- High Availability- Nonstop active routing (NSR)- Tunnels- IP-IP- Address scopes- Tunneling applications and considerations- Identify the concepts, benefits, applications, or requirements of high availability- Demonstrate knowledge of how to configure, monitor, or troubleshoot high availability components- Graceful Routing Engine switchover (GRES)- Address types, notation, and format- Unified In-Service Software Upgrade (ISSU)- Demonstrate knowledge of how to configure, monitor, or troubleshoot IP tunnels

Understanding functional and technical aspects of Intermediate System to Intermediate System (IS-IS)

The following will be discussed in **JN0-362 exam dumps**:

- Demonstrate knowledge of how to configure, monitor, or troubleshoot IS-IS- Levels and areas- Metrics- Attributes- Border Gateway Protocol (BGP)- Designated intermediate system (DIS)- Link-state database- Demonstrate knowledge of how to configure, monitor, or troubleshoot BGP- Identify the concepts, operation, or functionality of IS-IS- Routing policy application- Troubleshooting tools- TLVs- IS-IS PDUs- IBGP and EBGP functionality and interaction- Additional basic options- Identify the concepts, operation, or functionality of BGP- Route/path selection process- Adjacencies and neighbors- Routing policy application- BGP basic operation- BGP message types- Additional basic options- Groups and peers **NO.34**

What are two characteristic of static NAT SRX Series devices? (Choose two.)

- * Source and destination NAT rules take precedence over static NAT rules.
- * A reverse mapping rule is automatically created for the source translation.

- * Static NAT rule take precedence over source and destination NAT rules.
- * Static rules cannot coexist with destination NAT rules on the same SRX Series device configuration.

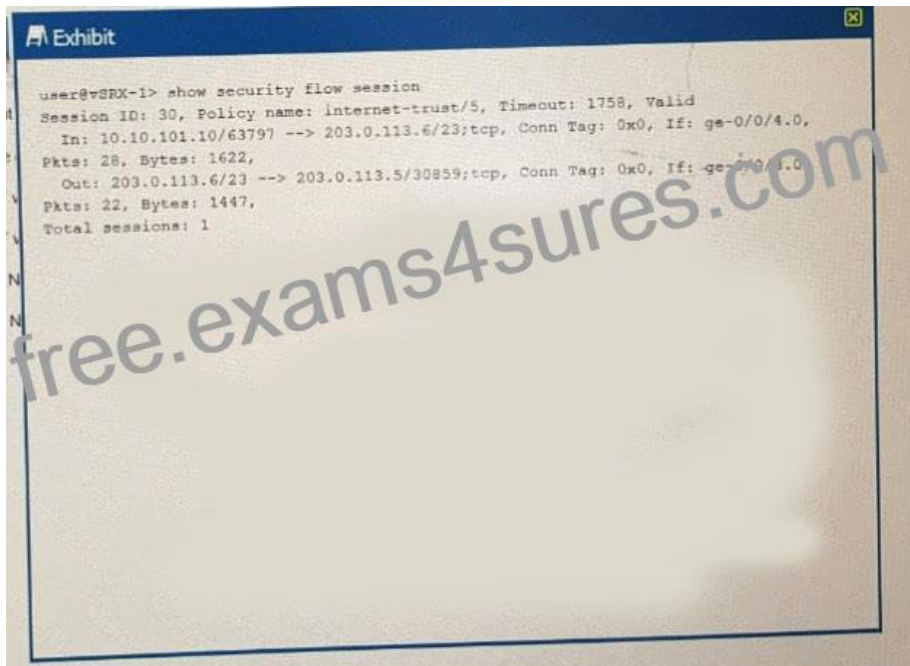

NO.35 Which statements about NAT are correct? (Choose two.)

- * When multiple NAT rules have overlapping match conditions, the rule listed first is chosen.
- * Source NAT translates the source port and destination IP address.
- * Source NAT translates the source IP address of packet.
- * When multiple NAT rules have overlapping match conditions, the most specific rule is chosen.

NO.36 The Sky ATP premium or basic-Threat Feed license is needed for which two features? (Choose two.)

- * Outbound protection
- * C&C feeds
- * Executable inspection
- * Custom feeds

NO.37 Referring to the exhibit.

Which type of NAT is being performed?

- * Source NAT with PAT
- * Source NAT without PAT
- * Destination NAT without PAT
- * Destination NAT with PAT

NO.38 You want to deploy, manage, and configure multiple SRX series devices without an on-premises software solution which solution would satisfy this requirement?

- * Junos Space Network Director
- * Juniper Sky Enterprise
- * Juniper Sky ATP
- * Juniper Advanced Threat Prevention.

NO.39 Which flow module components handles processing for UTM?

- * Policy
- * Zones
- * Services
- * Screen options

NO.40 Which security feature is applied to traffic on an SRX Series device when the device is running n packet mode?

- * Sky ATP
- * ALGs
- * Firewall filters
- * Unified policies

NO.41 Which two statements are correct about using global-based policies over zone-based policies? (Choose two.)

- * With global-based policies, you do not need to specify a source address in the match criteria.
- * With global-based policies, you do not need to specify a destination zone in the match criteria.
- * With global-based policies, you do not need to specify a destination address in the match criteria.
- * With global-based policies, you do not need to specify a source zone in the match criteria.

Explanation/Reference:

NO.42 Which two private cloud solution support vSRX devices? (Choose two.)

- * Microsoft Azure
- * Amazon Web Services (AWS)
- * VMware Web Services (AWS)
- * VMware NSX
- * Contrail Cloud

NO.43 Which statements is correct about global security policies?

- * Global policies allow you to regulate traffic with addresses and applications, regardless of their security zones.
- * Traffic matching global is not added to the session table.
- * Global policies eliminate the need to assign interface to security zones.
- * Global security require you to identify a source and destination zone.

NO.44 Firewall filters define which type of security?

- * Stateful
- * Stateless
- * NGFW
- * Dynamic enforcement

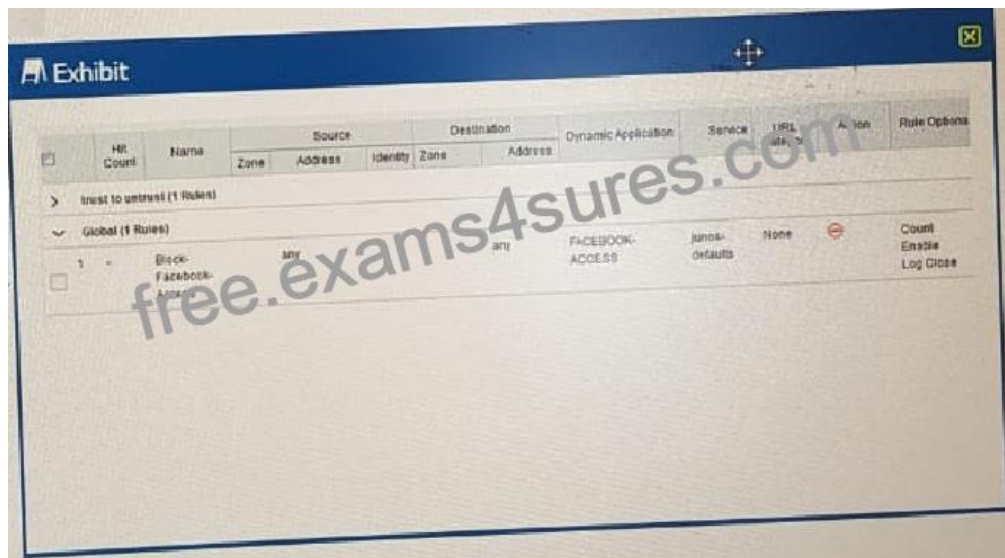

NO.45 The free licensing model for Sky ATP includes which features? (Choose two.)

- * C& C feeds
- * Infected host blocking
- * Executable file inspection
- * Compromised endpoint dashboard

NO.46 Which two statements about security policy processing on SRX series devices are true? (choose two)

- * Zone-Based security policies are processed before global policies.
- * Traffic matching a global policy cannot be processed against a firewall filter
- * Zone-Based security policies are processed after global policies
- * Traffic matching a zone-based policy is not processed against global polices.

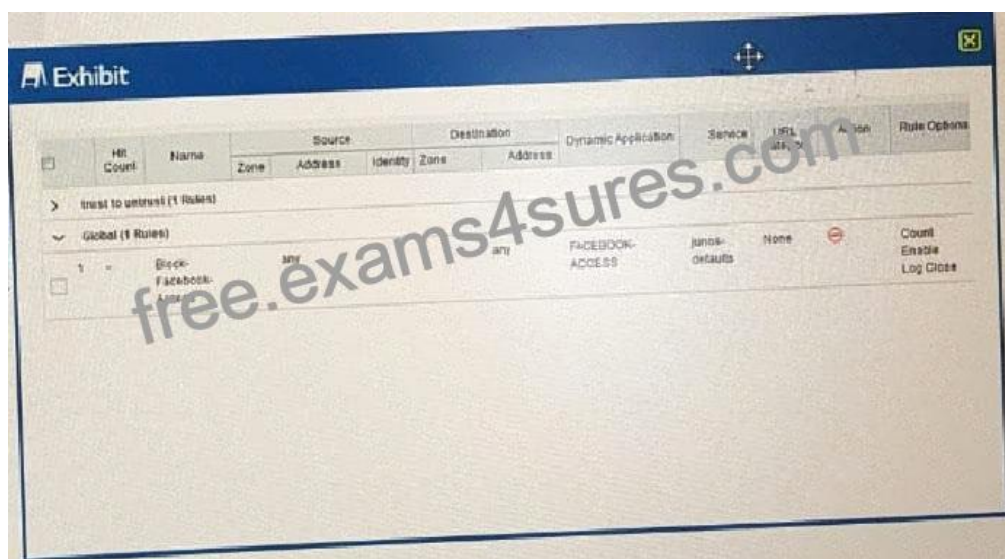

NO.47 Exhibit.

Which two statements are true? (Choose two.)

- * Logs for this security policy are generated.
- * Logs for this security policy are not generated.
- * Traffic statistics for this security policy are not generated.
- * Traffic statistics for this security policy are generated.

NO.48 Exhibit.

Which two statements are true? (Choose two.)

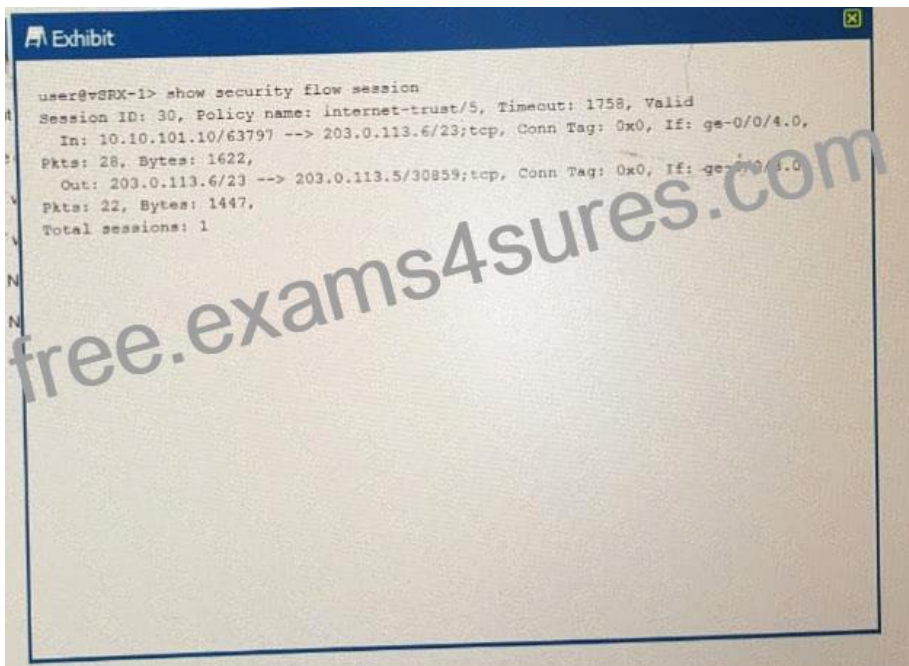

- * Logs for this security policy are generated.
- * Logs for this security policy are not generated.

- * Traffic static for this security policy are not generated.
- * Traffic statistics for this security policy are generated.

NO.49 Firewall filters define which type of security?

- * Stateful
- * Stateless
- * NGFW
- * Dynamic enforcement

NO.50 Referring to the exhibit.

Which type of NAT is being performed?

- * Source NAT with PAT
- * Source NAT without PAT
- * Destination NAT without PAT
- * Destination NAT with PAT

NO.51 Which security object defines a source or destination IP address that is used for an employee Workstation?

- * Zone
- * Screen
- * Address book entry
- * scheduler

NO.52 Click the Exhibit button.

Create user

User Name* ①: jdoe

Login ID ②: 2002
Range 100.64000

Full Name ③: John Doe

Password ④:

Confirm Password ⑤:

Role ⑥: admin

- admin
- jtac
- operator
- read-only
- super-user
- unauthorized

Cancel OK

Which two user roles shown in the exhibit are available by default? (Choose two.)

- * super-user
- * operator
- * jtac
- * admin

NO.53 Which two statements are true about Junos Space Security Director? (Choose two.)

- * Security Director supports creation and maintenance of metadata-based policies.
- * Security Director can deploy enforcement policies automatically to firewalls and switches.
- * Security Director can perform deep-packet analysis.
- * Security Director is preinstalled on SRX Series devices.

Additional Materials: Focus on Revision Book [Here's the best revision book to help you prepare for the Juniper JN0-230 exam: JNCIA Study Guide](#)

The JNCIA: Juniper Networks Certified Internet Associate study guide from Amazon is one of the best revision books you can use for your certification exam prep. Written by renowned IT leaders, Joseph M. Soricelli, John L. Hammond, and others, this guide gives painstaking details about the certification exam in a fulfilling way. It covers the essential test objectives ranging from the Junos software to firewall filters, and troubleshooting skills. Aside from giving in-depth coverage of the test objectives, this book also features hundreds of exciting practice test questions to help you dedicate enough time to the learning objectives.
