Unique Top-selling 1Z0-1080-22 Exams - New 2022 Oracle Pratice Exam
Oracle Enterprise Planning and Budgeting Cloud Service Dumps 1Z0-1080-22 Exam for Full Questions - Exam Study Guide

QUESTION 19

Which two roles can be set for Strategic Modeling? Choose two.
* Analyst
* Forecaster
* Planner
* Modeler

QUESTION 20

After loading Workforce data from external systems, which two statements describe actions you can take to process Workforce data? (Choose two.)
* If an existing employee was omitted from the load file, you can add that existing employee in Workforce.

Then assign properties and compensation options for that employee.

* To calculate updated compensation data after changing benefit options and rates from the loaded file, first change the benefit options and rates in Workforce and then run the Calculate Compensation business rule.

* If an existing employee was not loaded from the load file, you won’t be able to add their compensation information before first adding them to the source system and reloading the file.

* Because you cannot override loaded default assignments in Workforce, change the defaults in the load file and reload it.

* To override loaded default assignments, change them in Workforce. After saving your changes, updated compensation data is calculated.

QUESTION 21

Which two statements are true regarding the creation and management of business rules in module-based Planning? (Choose two.)

* Pre-defined business rules for modules may be modified, but may be ignored after an application upgrade.

* Custom business rules for modules can only be created using the graphical designer.

* Custom business rules can be created for each module.

* Modules cannot use regular business rules. Instead, they must be scripted using Groovy.

QUESTION 22

Which option is true when implementing access permissions in Planning? (Choose the best answer.)

* Users and groups are restricted from accessing applications by removing custom application and plan-type security

* A member that is set to read that has a parent with write access to all descendants will result in an access level of read

* Planning roles can be assigned to members in all dimensions in all modules in the application

QUESTION 23

In order to set up weekly planning for a continuous 18 months, which three options would need to be selected when initially configuring Financials? (Choose three.)

* Rolling Forecast

* Custom Periods

* Weeks to months mapping

* Plan Element dimension

* Weekly Planning

QUESTION 24

After enabling Financials, which three are recommended configuration tasks? (Choose three.)

* Setting up exchange rates (for multicurrency applications)

* Removing custom dimensions

* Adding custom expense driver categories

* Adding custom dimensions

* Completing Planning and Forecast Preparation

QUESTION 25

Which three are use cases for data maps? (Choose three.)
* To allow users to drill back to the data in a different cube.
* To integrate data between custom plan types and Planning modules
* To integrate data between Planning modules
* To push data from a planning cube to a reporting cube
* To create a replicated partition between cubes

QUESTION 26

Which three metadata artifacts can be exported to a flat file? (Choose three.)
* Exchange Rate Tables
* Dimensions
* Smart Lists
* Linked Reporting Objects
* Data Entry Forms

QUESTION 27

A company would like to configure Financials, Workforce, and Projects. They would like to plan and forecast the Project dimension in Financials, as well as track employee utilization in Projects.

Which two actions must they take to ensure that the Project dimension is shared and the data integrated correctly across all three modules? (Choose two.)
* In Workforce, ensure that the granularity is at Employee or Employee and Job
* In Financials, rename one of the custom dimensions to “Project” and enable it
* In Projects, ensure that the Employee driver-based expense is enabled
* In Workforce, rename one of the custom dimensions to “Project” and enable it

QUESTION 28

If you choose to create your own chart of accounts in Financials, which four statements are TRUE? (Choose four.)
* Predefined drivers and the chart of accounts you brought in can co-exist within the Account dimension member outline.
* You enable base or parent features to create an account structure with key members for you to add your own chart of accounts.
* You cannot reuse existing integrated financial statements and must design your own financial statements that include the accounts you imported.
* You do not need to enable base or parent features, and instead import the metadata directly into the Financials cube.
* You can perform calculations using existing rules, and plan using existing forms and dashboards.
* You input or import your own accounts for each enabled feature.

QUESTION 29

Which three are benefits of using EPM Enterprise Cloud Service over EPM Standard Cloud Service? (Choose three.)
* enable preseeded configurable content including dimensions, models, forms, rules, dashboards, infolets, and reports for Strategic Modeling
* with Free Form Planning, deploy Planning business processes with no dimension requirements and create business processes using Essbase outline files
* Custom Planning, which allows a high degree of business process customization to support business requirements
* use of the Groovy scripting language to create or customize business rules
* deploy more than one supported business process in the same instance

QUESTION 30

What is the correct sequence of steps for enabling each Planning module? Choose the best answer.
* Enable the module, refresh the database
* Run pre-configuration tasks, enable the module, configure the module
* Configure the module, refresh the database
* Enable the module, configure the module, run post configuration tasks

QUESTION 31

What does a navigation flow allow you to do? Choose the best answer.
* Promote a plan to your supervisor
* Display report variances by geography
* Run multiple business rules in a predetermined sequence
* Customize the clusters and cards that a user can access
The Navigation Flow Designer enables you to customize the business process interface. For example, you can change the names of the cards and clusters that display.

QUESTION 32

What three actions can you perform on the data displayed in the Data Integration Workbench? (Choose three.)
* Re-register or modify the data source system
* Open loaded data in Microsoft Excel
* Apply a filter using Equal and a specific value
* Apply a filter using Contains and a specific value
* Drill-through to source from specified data cells

QUESTION 33

Which three security design principles can help reduce overall security maintenance and troubleshooting, while still balancing security control? (Choose three.)
* Creating groups over assigning individual access permissions to users
* Configuring single sign-on (SSO)
* Assigning a higher level role than necessary, then scaling back access permissions
* Using inherited permissions
* Assigning global read access to each cube, then fine-tuning none and write access within dimensional security

QUESTION 34

Which statement is true when executing a lifecycle management migration? Choose the best answer.
* Restoring Essbase data from a snapshot will remove any data that doesn’t exist in the backup.
* Importing Dimensions will remove members that do not exist in the snapshot.
* Selected slices of data can be imported into Essbase.
* All forms that do not exist in the snapshot will be deleted.
