Updated Oct-2022 Test Engine to Practice Test for H12-521\_V1.0-ENU Exam Questions and Answers!  
HCIP-Intelligent Vision V1.0 Certification Sample Questions and Practice Exam

### QUESTION 274

Log in to the camera's web interface. Which of the following is the reason for the 'live request failed' message when requesting live streaming?

- \* The playback control is not installed normally or is forbidden to run
- \* The currently requested stream does not support live streaming
- \* When the local operating system is Windows 7/8/10 operating system, the browser is not run as an administrator
- \* There is a problem with the browser settings

### QUESTION 275

The chip of the Huawei HoloSens IVS3800 server adopts the ARM architecture and is based on the container cloud platform. It uses the highly optimized high-performance distributed computing and storage framework to provide users with a high-density, dynamic and flexible shared resource pool, and supports multi-level video management across platforms. Networking and intelligent

cross-domain collaboration capabilities, unified management and operation and maintenance, the entire network is a cloud.

- \* True
- \* False

#### QUESTION 276

If the "full coverage" method is used to configure the recording and bayonet data storage strategy, when the storage space is full, in what order will the system perform data coverage in turn?

- \* Videos or pictures beyond the retention period ? Videos or pictures without a retention period ?The earliest video or picture within the retention period
- \* The earliest record retention period or pictures ? not configured retention period of the video or pictures ? exceed retention of video or pictures over
- \* retention period of the video or pictures ? retained the earliest period of the video or pictures ? not configured retention period of the video or picture
- \* Recordings or pictures without a retention period ? Videos or pictures beyond the retention period ?The earliest video or picture within the retention period

#### QUESTION 277

Resource collaboration means that when the analysis resources of the upper-level domain IVS platform are tight, according to the business scenario, you can apply for the analysis resources of the lower-level domain or cross-level domain to perform intelligent analysis tasks based on video files.

- \* True
- \* False

#### QUESTION 278

When the police bayonet camera is used with the radar, the distance for the radar speed measurement to capture is 15m-30m.

- \* True
- \* False

#### QUESTION 279

In the backlight situation, the license plate captured by the camera is dark. Which of the following methods can solve the problem?

- \* Turn on the license plate brightness compensation
- \* Reduce saturation
- \* Reduce exposure compensation coefficient
- \* Decrease the exposure compensation coefficient

#### QUESTION 280

In order to ensure the smooth installation and deployment of the server, which of the following operations must be performed when configuring the text changer network connected to the IVS3800? (Multiple choice)

- \* The network ports corresponding to the two service planes of Inner Service and Outer\_Service need to form a bond (must be in LACP load sharing mode)
- \* The switch needs to close the group POE function, otherwise it will cause the server network to be blocked
- \* The switch must be connected to an NTP server
- \* The network ports corresponding to the two management planes, Inner\_OM and Outer\_OM, need to form a bond (must be in active/standby mode)

### QUESTION 281

What are the following types of video sites that need to be surveyed? (Multiple choice)

- \* Indoor monitoring
- \* Face recognition points
- \* Outdoor situation monitoring
- \* Road bayonet, micro bayonet

### QUESTION 282

Which of the following software interfaces can perform camera inspection operations?

- \* eSight network management interface
- \* CSP maintenance interface
- \* HoloSens iClient interface
- \* Camera web interface

### QUESTION 283

Equipment networking information helps to fully understand the on-site network environment and improve the accuracy of fault location. Which of the following does it include? (Multiple choice)

- \* Logical interconnection diagram of field devices
- \* Physical networking diagram of field equipment
- \* The network address of the field equipment interconnection, including VAN, IP, LAN, gateway, port, etc.
- \* Log information

### QUESTION 284

If the backup destination server has a network problem during the execution of the backup task and the backup is interrupted, then the real-time video of the camera of the backup source server will not be backed up during the time period when the network problem occurs.

- \* True
- \* False

### QUESTION 285

Container technology is used in the light edge video solution. Which of the following descriptions of container technology is correct? (Multiple choice)

- \* Containers are suitable for any business scenario
- \* Containers are suitable for microservice architecture business
- \* Docker is the container standard
- \* Containers can completely replace virtual machines

### QUESTION 286

Which of the following configurations can solve the problem that the live request failed when the live request is requested? (Multiple choice)

- \* Modify the protocol parameter to UDP on the camera web page
- \* On the camera web interface, select '&#8220;Advanced Configuration>Audio View>Video Stream Parameters&#8221; to select the stream type
- \* On the camera Web '&#8220;Preview Configuration&#8221; interface, click the lower left corner of the page and select the

stream type

- \* Modify the protocol parameter to TCP on the camera web page

#### QUESTION 287

Face recognition is divided into 3 steps in total: face image acquisition and detection, face image preprocessing (correction alignment) and face image matching and recognition

- \* True
- \* False

#### QUESTION 288

In the process of deploying IVS3800, if there are business nodes, the business nodes need to be managed on the CSP platform. What is the purpose of this? (Multiple choice)

- \* Clock used to synchronize business nodes
- \* For subsequent deployment of applications on business nodes
- \* Resources used to monitor business nodes
- \* Server used to manage business nodes

#### QUESTION 289

Huawei's integrated site provides power supply, energy storage, and photovoltaic modules for video sites, which can be adapted to various power supply scenarios such as pure mains, pure light, and optical hybrid.

- \* True
- \* False

#### QUESTION 290

After the camera performs the restoration of the default configuration, all parameters except () are restored to the factory configuration, which must be used with caution.

- \* Device port
- \* User upload certificate
- \* Device IP
- \* Focus position of hemisphere and tube machine in manual / semi-automatic mode

#### QUESTION 291

Network equipment commonly used in data centers includes (). (Multiple choice)

- \* Core switch
- \* Safety equipment
- \* Access switch
- \* Convergence switch

#### QUESTION 292

Stations using solar power supply schemes do not require mains access, and are the most used power supply scheme in the main urban area.

- \* True
- \* False

### QUESTION 293

Which of the following are the reasons why the video cannot be played after logging in to the live page? (Multiple choice)

- \* The local firewall is not turned off
- \* The playback control is not installed normally or is forbidden to run
- \* Browser setting problem
- \* When the native operating system is Windows 7/8/10 operating system, the browser is not run as an administrator
