This secures their business against cyber threats and also helps strengthen their system protection techniques. Therefore, the attainment of this certificate by nailing 700-765 test can give you the experience necessary in providing data protection and the required qualifications to land your dream job.

Q27. What is used to reduce attack surfaces?
* Remediation
* Access
* Segmentation
* Device trust

Q28. What are two critical networking challenges? (Choose two.)
* Threat protection

* Orchestration
* Automation
* Access
* Visibility
Explanation/Reference:

Q29. Which management platform helps strengthen security posture by enabling uniform policy deployment, uncovering and remediating unplanned changes, and extends protection to the application layer?
* Firepower Management Center
* Cisco Defense Orchestrator
* Firepower Policy Manager
* Firepower Device Manager

Q30. What are two common seller obstacles? (Choose two.)
* Unresponsive potential customers
* Overcrowded portfolios
* Complexity of solution components
* Seller competition
* Fragmented solutions

Q31. What feature of Anti-Spam Defense determines the reputation of an e-mail?
* IP addresses
* Threat analysis
* Context analysis
* Encryption score

Q32. How is Cisco Security able to dynamically add IP addresses of known malware domains to its list of ports to detect and block?
* Reputation Filtering
* Layer-4 Monitoring
* Data Loss Prevention
* URL Filtering

Q33. Which option is an ideal security application solution for a cloud data center use case?
* Cisco ASA 5505-X physical appliance with Cisco Adaptive Security Manager
* Cisco Firepower NGFW physical appliance with Cisco Defense Orchestrator
* Cisco Firepower NGFW virtual appliance with Cisco Firepower Management Center
* Cisco Firepower Threat Defense physical appliance for Amazon Web Services with Cisco Firepower Management Center

Q34. What are two common customer obstacles? (Choose Two)
* Limited resources
* High turnover of IT professionals
* Lack of solution integration
* Compliance regulations
* Security system blackouts

Q35. What are two steps organizations must take to secure IoT? (Choose two.)
* block contractors
* prevent blackouts
* acquire subscription solutions
* remediate malfunctions

* update equipment
Explanation/Reference:

Q36. What are two solutions Cisco offers for email security? (Choose Two)
* AMP for Email Security
* Umbrella
* Meraki
* Tetration
* Cloudlock

Q37. The current Cisco comprehensive framework solutions are divided into which three categories?

(Choose three.)
* Content Security
* Cloud Security
* Network Security
* Access Security
* Data Center Security
* Internet Security
* Advanced Malware Protection

Q38. What are two critical networking challenges? (Choose Two)
* Access
* Automation
* Orchestation
* Threat protection
* Visibility

Q39. Which two security areas are part of Cisco’s campus & branch solutions? (Choose two.)
* Network Analytics
* Mobile Access
* Behavioral Indication of Compromise
* Remote Access VPN
* File Retrospection and Trajectory

Q40. What is one of the reasons that customers need a Visibility & Enforcement solution?
* Businesses can’t see or protect devices on their network
* Network traffic is growing at an exponential rate
* Storage is moving from on-premises to cloud-based
* Organizations need the ability to block high-risk websites

Q41. Which two loT environment layers are protected by Stealthwatch? (Choose two.)
* Things
* Endpoints
* Internet/Cloud
* Access Points
* Control Layer

Q42. Which feature of Cisco AnyConnect allows pie-login authentication using windows machines, or single sign-on user authentication using Windows logon credentials?

* Secure Layer-2 Network Access
* Flexible AAA Options
* Differentiated Mobile Access
* Trusted Network Detection

Q43. Which StealthWatch device monitors, analyzes, separates, categorizes, and stores information from each flow, allowing it to create a baseline of typical expected network activity?
* Flow collector
* Advanced malware protection
* Forensic investigation
* Malware clustering

Q44. Which feature of AnyConnect provides customers the ability to monitor endpoint application usage to uncover potential behavior anomalies?
* Network Visibility Module
* Trusted Network Detection
* Differentiated Mobile Access
* Secure Layer 2 Network Access

Q45. Which are three key features of DNS-layer security? (Choose three.)
* Data Loss Prevention
* Retrospective Analysis
* Real-time sandboxing
* Provides visibility into all Internet activity
* Acts as first level of protection by providing security at DNS layer
* Resolves all DNS request through a single recursive DNS service

Q46. Which two products are involved in discovering, classifying, and verifying profiles? (Choose two.)
* Cisco Security Connector
* Identity Services Engine
* Industrial Network Director
* Duo
* Advanced Malware Protection

Q47. Which two attack vectors are protected by Cloud Security? (Choose Two)
* Endpoints
* Cloud
* Web
* Data Center
* Email
